

Welcome Back

We are back with full staff and regular clinic hours at Grand Rapids Dental Care beginning June 1st; providing restorative, emergency, and preventive care! We are excited to be back helping our patients achieve optimum oral health.

Our team has made changes to the care we provide based on recommendations from OSHA, the CDC, the Minnesota Board of Dentistry, and the American Dental Association. Here are some changes you may notice: You will be asked to update all clinical forms online prior to your visit. The clinical forms may be found on our website under Forms tab or pop-up link. You will also be asked a series of screening questions prior to your visit. These questions will be asked when you check in for your appointment, or you may choose to complete the questionnaire online any time before your appointment.

When you arrive at our clinic we ask that you wear a mask. A team member will meet you at the door, sanitize your hands, and take your temperature. For most procedures we will be wearing additional PPE (personal protective equipment).

We have implemented additional systemic safety measures as well including (but not limited to) whole office HEPA/UV air filtration systems, additional HEPA/UV sanitation in each operatory, and OZONE sanitation. If you have any further questions about how we are keeping our team and our patients safe, a staff member will happily review the details of all the safety measures we are taking.

Please understand all the measures we have implemented are for your safety and ours. We want to continue providing you with the best care possible and that looks a little different at this time. Please understand procedures may take a bit longer than they did before, but we will always do our best to be respectful of your time.

We want you to be assured we are confident in returning to work and providing your care and we have taken the proper precautions to reopen safely. We value your trust in us and look forward to seeing you soon!
